SPECIFICATIONS

• Dissipative Vinyl Proximity Card Holder
  ◦ Material Thickness: 0.012" (0.3 mm) front, & 0.024" (0.6 mm) back
  ◦ Material Tolerance (thickness): ±10%
  ◦ Material Color: matte front & back

• Highly visible yellow header with ESD protective symbol

• Includes a 1/8" (3 mm) x 9/16" (14 mm) punch through slot located 3/8" from the top

• 3-15/16" (100 mm) x 3-1/16" (76 mm) (Outer Dimension)

• Opening along top

• Embossed with: Menda & Made in America along the bottom of card holder

• Dissipative vinyl 1 x 10^4 to < 1 x 10^11 ohms, per ANSI/ESD STM11.11. Meets ANSI/ESD S20.20 and ANSI/ESD S541

• Tribocharging: Less than 100 volts

• Genuine Made in America - accept no substitutes

• We can do Customs just let us know your insert size

"It should be understood that any object, item, material or person could be a source of static electricity in the work enviroment. Removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity."

[ESD Handbook ESD TR20.20-2008 section 2.4 Sources of Static Electricity]
